POST CARE INSTRUCTIONS FOR CO2 LASER TREATMENT

1. Leave our bandage on for 24 hours. Keep the bandage dry and intact.
2. After 24 hours, remove the bandage and gently wash area with mild soap and water daily.
3. Apply Vaseline or another petroleum based product and cover with a bandage. Change bandage daily and keep covered for approximately 7-10 days or until the area is healed.
4. Apply sunblock to the area (SPF 30 or greater) daily after the area heals and is no longer being covered with a bandage.

****If you encounter any problems with these instructions, or you have any questions or concerns about how your treated area is healing, please call our office.****
